

## Logical design

Lithium Projman by Gabriele Musco.

Lithium Projman is free software (GPLv3 or any later version). You should have received a copy of the GNU GPL along with this program. If not, see <http://www.gnu.org/licenses/>

### Entities Glossary

| Entity       | Description   | Attributes  | Identificator |
|--------------|---|---|---------------|
| User         | User registered to the Lithium Project Management platform                  | Username, email, password, avatar                           | Username      |
| Project      | User created instance of a project to manage                                | Id, author, name, description, private, date_time           | Id            |
| Projcode     | Randomly generated code, used to invite another person in one's own project | Id, project, code   | Project, code |
| To_do        | Activity to be done in a project  | Id, parent_project, author, title, details, done, date_time | Id            |
| Note         | A note containing informations relevant to the project it belongs to        | Id, parent_project, title, content, pinned, date_time       | Id            |
| Comment_todo | A comment to a To_do instance   | Id, content, author, parent_todo, date_time                 | Id            |
| Comment_note | A comment to a Note instance  | Id, content, author, parent_note, date_time                 | Id            |

### Relations Glossary

| Relation | Description   | Involved entities  | Attributes |
|----------|---|--|------------|
| Creation | Indicates which user created an entity (ie: a Project has been created by a User) | User (0, n)<br>Project (1, 1)<br>To_do (1, 1)<br>Note (1, 1)<br>Comment_todo (1, 1)<br>Comment_note (1, 1) | Author     |

Lithium Projman by Gabriele Musco.

Lithium Projman is free software (GPLv3 or any later version). You should have received a copy of the GNU GPL along with this program. If not, see <http://www.gnu.org/licenses/>

## Lithium Project manager documentation

| Relation      | Description   | Involved entities   | Attributes   |
|---------------|---|---|--|
| Participation | Indicates the projects a user is participating to   | User (0, n)<br>Project (1, n)   | User, Project  |
| Belonging     | Indicates the belonging of an entity to its parent entity (ie: a To_do instance belongs to a project) | To_do (1, 1)<br>Project (0, n)<br><br>Comment_todo (1,1)<br>To_do (0, n)<br><br>Note (1, 1)<br>Project (0, n)<br><br>Comment_note (1, 1)<br>Note (0, n) | parent_project<br><br>parent_todo<br><br>parent_project<br><br>parent_note |
| Designation   | Indicates the User(s) designated to accomplish a certain To_do  | User (0, n)<br>To_do (0, n)   |  |
| Generation    | Indicates to which Project refers the Projcode  | Project (0, n)<br>Projcode (0,n)  | project  |

### Restriction Rules

- A project author must be participating said project

### Operations

- **OP1:** Register a new user
- **OP2:** A user creates a project
- **OP3:** A user creates a new To\_do
- **OP4:** A user changes (adds, removes) the designation to a To\_do
- **OP5:** A user edits the title/details of a To\_do
- **OP6:** A user creates a comment on a To\_do
- **OP7:** A user completes a To\_do
- **OP8:** A user creates a project Note
- **OP9:** A user edits a Note
- **OP10:** A user edits a Note

Lithium Projman by Gabriele Musco.

Lithium Projman is free software (GPLv3 or any later version). You should have received a copy of the GNU GPL along with this program. If not, see <http://www.gnu.org/licenses/>

- **OP11:** A user creates a comment to a Note
- **OP12:** A user deletes a To\_do
- **OP13:** A user deletes a Note
- **OP14:** A user leaves a Project
- **OP15:** A user deletes its Project
- **OP16:** A user deletes a comment\_todo
- **OP17:** A user deletes a comment\_note
- **OP18:** A user kicks another user from his project
- **OP19:** A user invites another user to his project
- **OP20:** A user accepts the invitation and joins a project
- **OP21:** Show all the To\_do entries for a project, showing first the ones with done==False, ordering by date\_time
- **OP22:** Show all the Note entries for a project, showing first the ones with pinned==True, ordering by date\_time
- **OP23:** Show all the participants of a project, including the Project author
- **OP24:** Show all the notes of a projects with pinned==True.
- **OP25:** Show a particular To\_do entry, with all the relative comments ordered by date\_time
- **OP26:** Show a particular Note entry, with all the relative comments ordered by date\_time
- **OP27:** Show all the projects participated by a particular User
- **OP28:** Show all the todos from various projects designated to a particular User
- **OP29:** A user kicks another user from one of his projects
- **OP30:** Delete a user and all entities that he created

### Physical design

```
CREATE TABLE IF NOT EXISTS User(username text PRIMARY KEY NOT NULL,  
password varchar(128) NOT NULL, email varchar(254) NOT NULL);
```

```
